**Addendum 5 to the CRI Technical Report (Version:2015, Update 1)**

This document revises the definition of the CRI-recognized default events in Table A.9 and other-exit events in Table A.10. It also updates the summary statistics of both types of the credit events in Table A.11. The changes in these tables are caused by two reasons: 1) as the CRI started to use its refined search method to collect credit events from supplementary sources (please see Version 2015 Update 1 Addendum 2), its coverage of credit events has been enhanced considerably; 2) the CRI has refined the ways that the credit events are treated in special cases, with the details explained below.

Firstly, the CRI has implemented a new rule for the cases where two credit events happen sequentially within a 6-month period. On the one hand, if two events of the same type happen in a row or a default event happens followed by another event of either type, we only keep the first event assuming that the series of events arise from the same source of financial distress. On the other hand, if an other-exit event (e.g. firm delisted from major exchange or moving from major exchange to OTC exchange) occurs followed by a default event, we will only keep the default, as it is of our major interest, but we will not keep or use any firm information between the two dates in any way.

Secondly, if a firm has stale stock price for more than a year but has no record on experiencing any credit events, we will assume that it has been suspended and exited from its stock exchange.
